Score and issue overview

SEO Health

AI Search Readiness

Performance

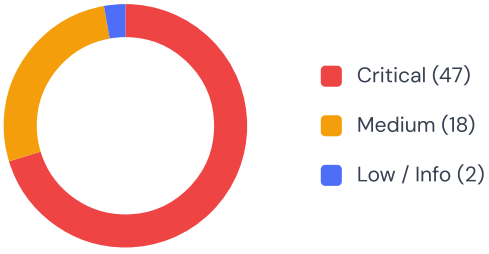

Technical Health

Overall score 68: Based on 3 of 4 categories (not available: Performance). Category scores come from the audit run (Audit #1 · November 4, 2026). AI Search Readiness is an on-site assessment, not a measure of AI platform citations.

67	47	18	2
Open Issues	Critical / High	Medium	Low / Info
Distinct open issues	Critical + high severity	Medium severity	Low + info severity

Issue Distribution

02

On-Page SEO Audit

52 open issues across 5 analyzed pages

52	37	13	2
All Issues	Critical / High	Medium	Low / Info
Open, excl. accessibility	Critical + high severity	Medium severity	Low + info severity

Top Issues

#	Issue	Severity	Pages affected	% of pages	Fix difficulty
1	Images Missing Alt Text	HIGH	1	20%	Hard
2	Images Missing Alt Text	HIGH	1	20%	Hard
3	Images Missing Alt Text	HIGH	1	20%	Hard
4	Images Missing Alt Text	HIGH	1	20%	Hard
5	Images Missing Alt Text	HIGH	1	20%	Hard
6	Invalid Schema Type for Page	HIGH	1	20%	Hard
7	Images Missing Alt Text	HIGH	1	20%	Hard
8	Images Missing Alt Text	HIGH	1	20%	Hard
9	Images Missing Alt Text	HIGH	1	20%	Hard
10	Images Missing Alt Text	HIGH	1	20%	Hard

Example affected pages

Images Missing Alt Text — 4 page(s)
https://www.wowinfotech.com/
https://www.wowinfotech.com/about-us
https://www.wowinfotech.com/career

On-Page Priority

✦ Odito AI Insight

The most widespread open issue in this list is "Images Missing Alt Text", affecting 1 page(s). Issues are ordered by severity first, then by pages affected.

Counts are distinct open issues and exclude accessibility issues. They reflect the project's current state at report time.

03

Structured Data Analysis

Schema type distribution

5	0	100%	7
With Schema	Missing Schema	Coverage	Schema Issues
Structured data detected	No structured data	of crawled pages	Open schema-related issues

Schema Type Distribution

- 5 pages with schema (100%)
- 7 schema types detected

Detected types:

— WebPage — 5 pages
— FAQPage — 3 pages
— Organization — 3 pages
— Service — 3 pages
— LocalBusiness — 2 pages
— BreadcrumbList — 2 pages
— Person — 1 pages

Structured Data Summary

✦ Odito AI Insight

All 5 crawled pages have structured data, across 7 schema type(s). Validate that the markup is accurate and complete for each page type. 7 open schema-related issue(s) were detected.

Technical checks, crawlability and structured data reflect the project's current state at report time.

04

Technical SEO Health

Server, security and indexation checks

80

8	1	1	80%
Passed	Warnings	Failed	Tech Health
of 10 checks	Need attention	Critical status	Passed / total checks

Technical Check Results

Technical Check	Status	Finding
SSL Certificate	✓ PASS	SSL certificate is valid (expires 2026-12-20)
Security Headers	✗ FAIL	5 pages missing critical security headers
Canonical Tags	✓ PASS	Canonical tags properly configured
Robots.txt	✓ PASS	Robots.txt is accessible and properly configured
Noindex on Key Pages	✓ PASS	All important pages are indexable
H1 Tags	▲ WARN	0 pages missing H1, 1 with multiple H1s
Structured Data / Schema	✓ PASS	5 pages with valid structured data
Mobile Friendliness	✓ PASS	Mobile-friendly configuration detected
XML Sitemap	✓ PASS	XML sitemap accessible with 473 URLs
OG / Social Tags	✓ PASS	Social media tags properly configured

Technical Priority Analysis

✦ Odito AI Insight

Checks in a critical state: Security Headers.

Technical checks, crawlability and structured data reflect the project's current state at report time.

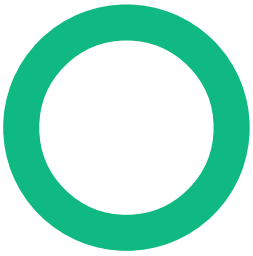

05

Crawlability Analysis

Indexability of crawled pages

5	5	0	100%
Pages Crawled	Indexable	Blocked	Indexable Rate
Analyzed	No noindex tag	Noindex directive	Indexable / crawled

Crawl Status Distribution

- 5 indexable (100%)
- 0 blocked (0%)

No crawled page carries a noindex directive.

Open Indexation Issues

Reason	Open issues	Severity	Suggested action
No open crawlability or indexation issues were detected.			

Crawlability Insight

✦ Odito AI Insight

All 5 crawled pages are indexable (100%).

"Indexable" means the page has no noindex robots meta directive; Odito does not verify what Google has indexed. Technical checks, crawlability and structured data reflect the project's current state at report time.

06

Core Web Vitals

Desktop and mobile Lighthouse analysis

PageSpeed data unavailable

No PageSpeed data available. Run a PageSpeed audit first.

Lighthouse results from the project's most recent PageSpeed run, which is overwritten on each re-crawl. Ratings use Google's published Core Web Vitals bands.

07

Keyword Ranking Analysis

1 keyword tracked · local · 1st Floor and 2nd Floor, Nutan Sayali Society, College Rd, near Croma Store, Thatte Nagar, Nashik, Maharashtra 422005, India

1	0	1	0
Tracked	Ranking	Not in Top 100	Top 10
keywords	of 1	last scan succeeded	of 1

Keyword Position Table

Keyword	Current	Best	Maps rank	Status
best software company near me	—	—	#34	Not in top 100

Keyword Ranking Insights

✦ Odito AI Insight

None of the 1 tracked keywords ranked in the top 100 at the last scan.

Odito-tracked rankings, last scanned November 4, 2026; this is separate from Google Search Console data. Rankings are checked on their own schedule and may not match the audit date.

09

Accessibility

Accessibility issues found by the audit crawl

15	10	5	5
Open Findings	Critical / High	Medium	Pages Analyzed
Distinct open issues	Critical + high severity	Medium severity	5 finding types

Odito's accessibility scan reports findings only: it does not produce an accessibility score and does not map findings to WCAG criteria.

Findings

Finding	Severity	Pages affected	% of pages	Fix difficulty
Missing focus indicators Example: https://www.wowinfotech.com/ · https://www.wowinfotech.com/about-us	HIGH	5	100%	Hard
CSS removes focus indicators Example: https://www.wowinfotech.com/ · https://www.wowinfotech.com/wowsuite	HIGH	2	40%	Hard
Focus trap detected in body.wdp-body-lock - keyboard users cannot navigate away from 4 elements Example: https://www.wowinfotech.com/ · https://www.wowinfotech.com/about-us	HIGH	2	40%	Hard
Unreachable interactive elements detected Example: https://www.wowinfotech.com/ · https://www.wowinfotech.com/about-us	HIGH	1	20%	Hard
Small tap targets detected Example: https://www.wowinfotech.com/ · https://www.wowinfotech.com/about-us	MEDIUM	5	100%	Medium

Finding rows are per rule and location, as in the dashboard, so a rule can appear more than once. Recommended actions are in the Recommendations section.

10

AEO — Answer Engine Optimization

How well content is structured to be extracted as a direct answer

27	5	30	Nov 4, 2026
AEO Score	Pages Scored	Rule Findings	Assessed
Answer-readiness score	Pages assessed	All severities	Hub run date

On-site readiness checks. These are not measured AI-platform citations, mentions or rankings. Assessed November 4, 2026 on 5 page(s).

Score by category

Category	Score	Status	Failed checks
Answer readiness	47	NEEDS WORK	8
Question coverage	50	NEEDS WORK	5
Faq coverage	0	CRITICAL	3
Snippet score	40	NEEDS WORK	9
Voice search	0	CRITICAL	5

Answer signals

Signal (rule)	Result	Pages failing	Applicable pages
Direct answer in opening (AEO-046)	Fail	4	5
Question-style headings (AEO-047)	Fail	5	5
FAQ schema (AEO-048)	Fail	3	3
HowTo schema (AEO-049)	Pass	0	5
Speakable schema (AEO-055)	Fail	5	5

Content structure

Measure	Value
Question-style H2 headings / all H2 headings	8 / 84
Pages with FAQ schema	3
FAQ entries in schema vs visible on page	13 vs 3

Continued on the next page

10 AEO — Answer Engine Optimization (continued)

Table continued from the previous page

Measure	Value
Pages with speakable markup	0 (0%)

FAQ opportunities

Question	State	Pages	Recommendation
How quickly can I deploy WOW Agent?	Missing schema	1	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.
Can it handle multiple languages?	Missing schema	1	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.
How secure is my data?	Missing schema	1	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.
Can I customize the AI responses?	Missing schema	1	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.
Does it integrate with existing platforms?	Missing schema	1	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.
Can I use only selected services?	Missing schema	1	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.

Findings and recommended actions

Finding	Severity	Pages	Recommended action (from the audit)
No Direct Answer in First 60 Words AEO-046 · Answer readiness	CRITICAL	4	Restructure the opening paragraph to lead with the key answer or definition. Move all context and background after the first 2-3 substantive sentences.

Continued on the next page

10 AEO — Answer Engine Optimization (continued)

Table continued from the previous page

Finding	Severity	Pages	Recommended action (from the audit)
H2 Headings Are Not Question-Optimized AEO-047 · Question coverage	HIGH	5	Rephrase at least 30% of H2 headings as natural language questions that reflect what a user would ask about each section's topic.
Answer Buried Behind Long Introduction AEO-050 · Answer readiness	HIGH	4	Move the key answer or primary claim to the top of the page. Context, background, and brand narrative should follow the answer, not precede it.
FAQ Schema Contains Entries With No Visible Content Match AEO-048 · Faq coverage	HIGH	3	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.
Insufficient List Formatting for AI Extraction AEO-051 · Snippet score	HIGH	2	Convert key sections (steps, features, benefits, requirements) into bullet or numbered lists with at least 3 items each.
No Authoritative External Sources Cited AEO-054 · Snippet score	MEDIUM	5	Add 1-3 outbound links to authoritative sources that directly support your page's key claims.
Comparison Content Not Structured as Table AEO-052 · Snippet score	MEDIUM	2	Convert comparison content into an HTML table with clear column headers and one row per compared item.
Speakable Schema Missing AEO-055 · Voice search	LOW	5	Add Speakable schema targeting your summary paragraph and H1. Use stable CSS selectors (e.g. '.article-summary', 'h1') not dynamic IDs.

11

AISO — AI Search Optimization

How accessible and citable the site is to AI search systems

87	100	100	54	96
AISO Score	**Crawlability**	**Citability**	**Authority**	**Coverage**
Overall AI-search readiness	Bot access & fetchability	Quotable structure	Trust signals	Topic & page coverage

On-site readiness checks. These are not measured AI-platform citations, mentions or rankings. Assessed November 4, 2026 on 5 page(s).

Score by category

Category	Score	Checks run	Passed	Failed
Crawlability	100	50	50	0
Citability	100	15	15	0
Authority	54	13	7	6
Coverage	96	50	48	2

AI crawler access

AI crawler / file	Check result
GPTBot	Pass
ClaudeBot	Pass
PerplexityBot	Pass
Google-Extended	Pass
Bingbot	Pass
llms.txt	Optimized

Results come from Odito's robots.txt / llms.txt checks. They show whether these crawlers can access the site, not whether any AI platform has used or cited it.

Findings and recommended actions

Finding	Severity	Pages	Recommended action (from the audit)
Author or Publisher Not Identified AISO-A2 · Authority	MEDIUM	4	Add Person schema for the author, or an 'author' property within Article/BlogPosting schema on content pages.

Continued on the next page

11 AISO — AI Search Optimization (continued)

Table continued from the previous page

Finding	Severity	Pages	Recommended action (from the audit)
About / Company Information Not Detectable AISO-A3 · Authority	MEDIUM	2	Add an About page and link to it from the main navigation. Include company name, founding context, and mission on that page.
No FAQ or HowTo Schema Present AISO-CV7 · Coverage	MEDIUM	2	Where content includes Q&A or step-by-step instructions, mark it up with FAQPage or HowTo schema.

12

GEO — Generative Engine Optimization

Entity, knowledge-graph and brand signals used by generative engines

40	C	1	1
GEO Score	Entity Trust Grade	Validated Entities	Missing Links
Entity & brand readiness	Grade supplied by the hub	Entities confirmed	Entity links not found

On-site readiness checks. These are not measured AI-platform citations, mentions or rankings. Assessed November 4, 2026 on 5 page(s).

Knowledge-graph signals

Signal	Score	Passed	Failed
Entity Authority Score	50	3	3
Knowledge Graph Score	0	0	4
Brand Corroboration	9	1	10

Entity validation checks

Check	Result	Pages failing / applicable	Detail
LocalBusiness Schema	Warning	1 / 2	1 of 2 applicable pages need updates
Geo Coordinates	Warning	1 / 2	1 of 2 applicable pages need updates
Opening Hours	Warning	1 / 2	1 of 2 applicable pages need updates
NAP Consistency	Fail	2 / 2	Missing on 2 of 2 applicable pages
SameAs Links	Warning	1 / 2	1 of 2 applicable pages need updates
Aggregate Rating	Fail	2 / 2	Missing on 2 of 2 applicable pages

Entity schema coverage

Schema type	Applicable pages	With schema	Coverage
FAQPage	2	2	100%
LocalBusiness	1	1	100%
Organization	1	1	100%

12 GEO — Generative Engine Optimization (continued)

Opportunities

Priority	Opportunity	Why it matters
MEDIUM	AggregateRating Schema Missing	Add AggregateRating schema to your LocalBusiness with ratingValue, reviewCount, and bestRating properties if your business has verifiable reviews.
HIGH	NAP Inconsistency — Schema and Visible Text Do Not Match	Ensure the business name, address, and phone number in your LocalBusiness schema exactly match the visible NAP text on your contact or homepage.
MEDIUM	No SameAs Links Declared	Add a sameAs array to your LocalBusiness schema pointing to your Google Business Profile, Wikidata entry, and major directory profiles.
HIGH	GeoCoordinates Missing from LocalBusiness Schema	Add a GeoCoordinates object inside your LocalBusiness schema with accurate latitude and longitude decimal values.

Findings and recommended actions

Finding	Severity	Pages	Recommended action (from the audit)
LocalBusiness Schema Missing GEO-059 · Entity authority	CRITICAL	1	Add LocalBusiness schema (or a specific subtype matching your business category) with complete name, PostalAddress, telephone, and URL in JSON-LD in the <head>.
NAP Inconsistency — Schema and Visible Text Do Not Match GEO-G1 · Brand corroboration	HIGH	2	Ensure the business name, address, and phone number in your LocalBusiness schema exactly match the visible NAP text on your contact or homepage.
City Name Missing from H1 or Opening Content GEO-063 · Knowledge graph score	HIGH	2	Include the city name naturally in the H1 heading and within the first 100 words of body text. One natural mention in each position is sufficient.
GeoCoordinates Missing from LocalBusiness Schema GEO-060 · Entity authority	HIGH	1	Add a GeoCoordinates object inside your LocalBusiness schema with accurate latitude and longitude decimal values.
Business Hours Not in Structured Schema GEO-061 · Entity authority	HIGH	1	Add OpeningHoursSpecification entries to your LocalBusiness schema for every operating day, using ISO 8601 time format (HH:MM).
AggregateRating Schema Missing GEO-G3 · Brand corroboration	MEDIUM	2	Add AggregateRating schema to your LocalBusiness with ratingValue, reviewCount, and bestRating properties if your business has verifiable reviews.
Google Maps Embed Missing GEO-062 · Knowledge graph score	MEDIUM	2	Embed a Google Maps iframe on your contact or location page using the embed URL from Google Maps > Share > Embed a map.
No SameAs Links Declared GEO-G2 · Brand corroboration	MEDIUM	1	Add a sameAs array to your LocalBusiness schema pointing to your Google Business Profile, Wikidata entry, and major directory profiles.

Continued on the next page

12 GEO — Generative Engine Optimization (continued)

Table continued from the previous page

Finding	Severity	Pages	Recommended action (from the audit)
Hreflang Missing on Multi-Locale Site GEO-065 · Brand corroboration	LOW	5	Implement hreflang link elements for all language/region combinations. Include a self-referencing tag on every page and an x-default fallback. Use BCP-47 language codes (e.g. en-US, fr-FR).

13

Recommendations

Prioritised from the findings in this report

Ordered by the finding's own severity, then pages affected, then easier fixes first. Action text is stored guidance from the audit; where none is stored, none is shown. Showing the top 6 of 25 finding(s); the full list is in the dashboard. Nothing here is marked as fixed: fixes are only confirmed by a later audit.

Prioritised actions

#	Recommendation	Priority (severity)	Pages	Why it matters and recommended action
1	**No Direct Answer in First 60 Words** AEO · AEO-046 · answer_readiness	CRITICAL	4	This page does not deliver a direct answer within the first 60 words of body content. AI extraction systems are unlikely to select it for answer-layer citations. Restructure the opening paragraph to lead with the key answer or definition. Move all context and background after the first 2-3 substantive sentences.
2	**LocalBusiness Schema Missing** GEO · GEO-059 · entity_authority	CRITICAL	1	No LocalBusiness schema found. AI systems and knowledge graph engines cannot identify this business as a local entity, making geographic entity association impossible. Add LocalBusiness schema (or a specific subtype matching your business category) with complete name, PostalAddress, telephone, and URL in JSON-LD in the <head>.
3	**H2 Headings Are Not Question-Optimized** AEO · AEO-047 · question_coverage	HIGH	5	Fewer than 30% of H2 headings are phrased as questions. AI systems prefer section headings that mirror user query patterns for section-level extraction. Rephrase at least 30% of H2 headings as natural language questions that reflect what a user would ask about each section's topic.
4	**Missing focus indicators** Accessibility · keyboard_accessibility	HIGH	5	Expected: Keyboard users must be able to move focus out of every component (a modal may trap focus only while it is open and must be closable)
5	**Answer Buried Behind Long Introduction** AEO · AEO-050 · answer_readiness	HIGH	4	The page opens with more than 100 words of introductory content before delivering any substantive answer. AI systems weight early content most heavily for extraction. Move the key answer or primary claim to the top of the page. Context, background, and brand narrative should follow the answer, not precede it.
6	**FAQ Schema Contains Entries With No Visible Content Match** AEO · AEO-048 · faq_coverage	HIGH	3	One or more FAQ schema entries have no corresponding visible question/answer pair on the page. Schema/content mismatches risk rich result penalties and degrade AI extraction accuracy. For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.

14

About Odito AI

SEO and AI search readiness auditing

About This Report

Odito AI audits a website for traditional SEO health and on-site readiness for AI search. This report summarises the audit data available for the website named on each page at the time the report was generated. Scores and counts reflect the pages that were crawled and the checks that were run; sections without data are shown as unavailable rather than estimated.

SEO Audit
Site crawl with on-page and technical SEO checks, grouped by severity

Accessibility Checks
Accessibility issues detected across crawled pages

PageSpeed
Desktop and mobile Lighthouse results, including Core Web Vitals

Keyword Tracking
Tracked keyword positions for your target locations

AI Search Readiness
On-site AEO, GEO and AISO checks that assess how ready your content is for AI search

Structured Data
Schema markup coverage and errors across crawled pages
