Found 1 HTTP resource(s) on HTTPS page - creates security vulnerabilities — 5 page(s)
https://www.asgeyehospital.com/
https://www.asgeyehospital.com/about-us
https://www.asgeyehospital.com/blog

On-Page Priority

✦ Odito AI Insight

The most widespread open issue in this list is "Images Missing Alt Text", affecting 5 page(s). Issues are ordered by severity first, then by pages affected.

Counts are distinct open issues and exclude accessibility issues. They reflect the project's current state at report time.

03

Structured Data Analysis

Schema type distribution

5	0	100%	6
With Schema	Missing Schema	Coverage	Schema Issues
Structured data detected	No structured data	of crawled pages	Open schema-related issues

Schema Type Distribution

- 5 pages with schema (100%)
- 6 schema types detected

Detected types:

— Organization — 5 pages
— WebSite — 5 pages
— WebPage — 5 pages
— BreadcrumbList — 5 pages
— ImageObject — 4 pages
— MedicalOrganization — 1 pages

Structured Data Summary

✦ Odito AI Insight

All 5 crawled pages have structured data, across 6 schema type(s). Validate that the markup is accurate and complete for each page type. 6 open schema-related issue(s) were detected.

Technical checks, crawlability and structured data reflect the project's current state at report time.

04

Technical SEO Health

Server, security and indexation checks

70

7	0	3	70%
Passed	Warnings	Failed	Tech Health
of 10 checks	Need attention	Critical status	Passed / total checks

Technical Check Results

Technical Check	Status	Finding
SSL Certificate	✓ PASS	SSL certificate is valid (expires 2027-01-23)
Security Headers	✗ FAIL	5 pages missing critical security headers
Canonical Tags	✓ PASS	Canonical tags properly configured
Robots.txt	✓ PASS	Robots.txt is accessible and properly configured
Noindex on Key Pages	✓ PASS	All important pages are indexable
H1 Tags	✗ FAIL	1 pages missing H1, 1 with multiple H1s
Structured Data / Schema	✓ PASS	5 pages with valid structured data
Mobile Friendliness	✓ PASS	Mobile-friendly configuration detected
XML Sitemap	✓ PASS	XML sitemap accessible with 1981 URLs
OG / Social Tags	✗ FAIL	4 pages missing Open Graph tags

Technical Priority Analysis

✦ Odito AI Insight

Checks in a critical state: Security Headers, H1 Tags, OG / Social Tags.

Technical checks, crawlability and structured data reflect the project's current state at report time.

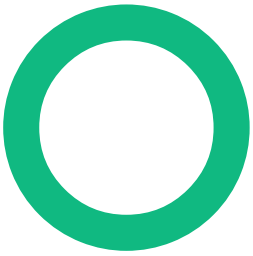

05

Crawlability Analysis

Indexability of crawled pages

5	5	0	100%
Pages Crawled	Indexable	Blocked	Indexable Rate
Analyzed	No noindex tag	Noindex directive	Indexable / crawled

Crawl Status Distribution

- 5 indexable (100%)
- 0 blocked (0%)

No crawled page carries a noindex directive.

Open Indexation Issues

Reason	Open issues	Severity	Suggested action
No open crawlability or indexation issues were detected.			

Crawlability Insight

✦ Odito AI Insight

All 5 crawled pages are indexable (100%).

"Indexable" means the page has no noindex robots meta directive; Odito does not verify what Google has indexed. Technical checks, crawlability and structured data reflect the project's current state at report time.

06

Core Web Vitals

Desktop and mobile Lighthouse analysis

44	16	8.1s	6212ms
Desktop Score	Mobile Score	Mobile LCP	Mobile TBT
Lighthouse	Lighthouse	Target < 2.5s	Target < 200ms

Desktop vs Mobile Comparison

Desktop: 44/100

Mobile: 16/100

Good: ≥90 Fair: 50–89 Poor: <50

Core Web Vitals — Detailed

Metric	Desktop	Rating	Mobile	Rating
First Contentful Paint (FCP)	1.1s	Good	5.6s	Poor
Largest Contentful Paint (LCP)	1.8s	Good	8.1s	Poor
Total Blocking Time (TBT)	3240ms	Poor	6212ms	Poor
Cumulative Layout Shift (CLS)	0.152	Needs Work	0.212	Needs Work
Time to First Byte (TTFB)	232ms	Good	226ms	Good

Core Web Vitals Summary

✦ Odito AI Insight

Mobile performance scored 16/100 and desktop 44/100. Mobile LCP is 8.1s (poor) and mobile TBT is 6212ms (poor).

Lighthouse results from the project's most recent PageSpeed run, which is overwritten on each re-crawl. Ratings use Google's published Core Web Vitals bands.

07

Keyword Ranking Analysis

1 keyword tracked · national · india

1	1	0	1
Tracked	Ranking	Not in Top 100	Top 10
keywords	of 1	last scan succeeded	of 1

Keyword Position Table

Keyword	Current	Best	Status
best eye care hospital in india	#2	#2	Ranking

Keyword Ranking Insights

✦ Odito AI Insight

1 of 1 tracked keywords rank in the top 100 (1 in the top 10).

Odito-tracked rankings, last scanned October 24, 2026; this is separate from Google Search Console data. Rankings are checked on their own schedule and may not match the audit date.

09

Accessibility

Accessibility issues found by the audit crawl

24	19	5	5
Open Findings	Critical / High	Medium	Pages Analyzed
Distinct open issues	Critical + high severity	Medium severity	6 finding types

Odito's accessibility scan reports findings only: it does not produce an accessibility score and does not map findings to WCAG criteria. Lighthouse's separate accessibility category scored desktop 89/100 and mobile 89/100 (automated checks only; not a WCAG compliance result).

Findings

Finding	Severity	Pages affected	% of pages	Fix difficulty
Form input missing label Example: https://www.asgeyehospital.com/ · https://www.asgeyehospital.com/about-us	HIGH	5	100%	Hard
Missing focus indicators Example: https://www.asgeyehospital.com/ · https://www.asgeyehospital.com/about-us	HIGH	5	100%	Hard
CSS removes focus indicators Example: https://www.asgeyehospital.com/ · https://www.asgeyehospital.com/about-us	HIGH	5	100%	Hard
Form input missing label Example: https://www.asgeyehospital.com/ · https://www.asgeyehospital.com/about-us	HIGH	3	60%	Hard
Focus trap detected in input[name="dob"] – keyboard users cannot navigate away from 1 element Example: https://www.asgeyehospital.com/ · https://www.asgeyehospital.com/about-us	HIGH	1	20%	Hard
Small tap targets detected Example: https://www.asgeyehospital.com/ · https://www.asgeyehospital.com/about-us	MEDIUM	5	100%	Medium

Finding rows are per rule and location, as in the dashboard, so a rule can appear more than once. Recommended actions are in the Recommendations section.

10

AEO — Answer Engine Optimization

How well content is structured to be extracted as a direct answer

27	5	30	Oct 24, 2026
AEO Score	Pages Scored	Rule Findings	Assessed
Answer-readiness score	Pages assessed	All severities	Hub run date

On-site readiness checks. These are not measured AI-platform citations, mentions or rankings. Assessed October 24, 2026 on 5 page(s).

Score by category

Category	Score	Status	Failed checks
Answer readiness	33	CRITICAL	10
Question coverage	50	NEEDS WORK	5
Faq coverage	0	CRITICAL	3
Snippet score	53	NEEDS WORK	7
Voice search	0	CRITICAL	5

Answer signals

Signal (rule)	Result	Pages failing	Applicable pages
Direct answer in opening (AEO-046)	Fail	5	5
Question-style headings (AEO-047)	Fail	5	5
FAQ schema (AEO-048)	Fail	3	3
HowTo schema (AEO-049)	Pass	0	5
Speakable schema (AEO-055)	Fail	5	5

Content structure

Measure	Value
Question-style H2 headings / all H2 headings	6 / 149
Pages with FAQ schema	0
FAQ entries in schema vs visible on page	0 vs 1

Continued on the next page

10 AEO — Answer Engine Optimization (continued)

Table continued from the previous page

Measure	Value
Pages with speakable markup	0 (0%)

Findings and recommended actions

Finding	Severity	Pages	Recommended action (from the audit)
No Direct Answer in First 60 Words AEO-046 · Answer readiness	CRITICAL	5	Restructure the opening paragraph to lead with the key answer or definition. Move all context and background after the first 2-3 substantive sentences.
Answer Buried Behind Long Introduction AEO-050 · Answer readiness	HIGH	5	Move the key answer or primary claim to the top of the page. Context, background, and brand narrative should follow the answer, not precede it.
H2 Headings Are Not Question-Optimized AEO-047 · Question coverage	HIGH	5	Rephrase at least 30% of H2 headings as natural language questions that reflect what a user would ask about each section's topic.
FAQ Schema Contains Entries With No Visible Content Match AEO-048 · Faq coverage	HIGH	3	For each mismatched entry: either add the Q&A as visible content on the page, or remove the entry from the FAQPage schema. Every schema FAQ must have a visible counterpart.
No Authoritative External Sources Cited AEO-054 · Snippet score	MEDIUM	5	Add 1-3 outbound links to authoritative sources that directly support your page's key claims.
Comparison Content Not Structured as Table AEO-052 · Snippet score	MEDIUM	2	Convert comparison content into an HTML table with clear column headers and one row per compared item.
Speakable Schema Missing AEO-055 · Voice search	LOW	5	Add Speakable schema targeting your summary paragraph and H1. Use stable CSS selectors (e.g. '.article-summary', 'h1') not dynamic IDs.

11

AISO — AI Search Optimization

How accessible and citable the site is to AI search systems

62	0	100	64	84
AISO Score	Crawlability	Citability	Authority	Coverage
Overall AI-search readiness	Bot access & fetchability	Quotable structure	Trust signals	Topic & page coverage

On-site readiness checks. These are not measured AI-platform citations, mentions or rankings. Assessed October 24, 2026 on 5 page(s).

Score by category

Category	Score	Checks run	Passed	Failed
Crawlability	0	30	0	30
Citability	100	15	15	0
Authority	64	14	9	5
Coverage	84	50	42	8

AI crawler access

AI crawler / file	Check result
GPTBot	Fail
ClaudeBot	Fail
PerplexityBot	Fail
Google-Extended	Fail
Bingbot	Fail
llms.txt	Fail

Results come from Odito's robots.txt / llms.txt checks. They show whether these crawlers can access the site, not whether any AI platform has used or cited it.

Findings and recommended actions

Finding	Severity	Pages	Recommended action (from the audit)
Google-Extended Blocked — AI Overview Visibility Eliminated AISO-004 · Crawlability	CRITICAL	N/A	Remove the Google-Extended block immediately. If blocked via wildcard, add: User-agent: Google-Extended / Allow: /.

Continued on the next page

11 AISO — AI Search Optimization (continued)

Table continued from the previous page

Finding	Severity	Pages	Recommended action (from the audit)
PerplexityBot Access Blocked AISO-002 · Crawlability	CRITICAL	N/A	Remove the PerplexityBot block from robots.txt, or add an explicit Allow: / override if blocked by a wildcard rule.
GPTBot Access Blocked AISO-001 · Crawlability	CRITICAL	N/A	Remove the Disallow directive for GPTBot. If blocked by a wildcard rule, add: User-agent: GPTBot / Allow: / beneath the wildcard block.
ClaudeBot Access Blocked AISO-003 · Crawlability	HIGH	N/A	Remove the ClaudeBot block from robots.txt.
Bingbot Blocked — Microsoft Copilot Visibility Lost AISO-005 · Crawlability	HIGH	N/A	Remove the Bingbot block from robots.txt.
No FAQ or HowTo Schema Present AISO-CV7 · Coverage	MEDIUM	5	Where content includes Q&A or step-by-step instructions, mark it up with FAQPage or HowTo schema.
Author or Publisher Not Identified AISO-A2 · Authority	MEDIUM	5	Add Person schema for the author, or an 'author' property within Article/BlogPosting schema on content pages.
Insufficient Internal Linking AISO-CV2 · Coverage	MEDIUM	2	Add at least 3 contextually relevant internal links to related pages on your site.
Page Is Orphaned AISO-CV4 · Coverage	MEDIUM	1	Add at least one internal link to this page from a relevant hub, category, or navigation page.
llms.txt File Missing AISO-006 · Crawlability	MEDIUM	N/A	Create an llms.txt file at your domain root following the llmstxt.org specification.

12

GEO — Generative Engine Optimization

Entity, knowledge-graph and brand signals used by generative engines

13	C	0	2
GEO Score	Entity Trust Grade	Validated Entities	Missing Links
Entity & brand readiness	Grade supplied by the hub	Entities confirmed	Entity links not found

On-site readiness checks. These are not measured AI-platform citations, mentions or rankings. Assessed October 24, 2026 on 5 page(s).

Knowledge-graph signals

Signal	Score	Passed	Failed
Entity Authority Score	0	0	6
Knowledge Graph Score	0	0	4
Brand Corroboration	0	0	11

Entity validation checks

Check	Result	Pages failing / applicable	Detail
LocalBusiness Schema	Fail	2 / 2	Missing on 2 of 2 applicable pages
Geo Coordinates	Fail	2 / 2	Missing on 2 of 2 applicable pages
Opening Hours	Fail	2 / 2	Missing on 2 of 2 applicable pages
NAP Consistency	Fail	2 / 2	Missing on 2 of 2 applicable pages
SameAs Links	Fail	2 / 2	Missing on 2 of 2 applicable pages
Aggregate Rating	Fail	2 / 2	Missing on 2 of 2 applicable pages

Entity schema coverage

Schema type	Applicable pages	With schema	Coverage
LocalBusiness	1	0	0%
Article	1	0	0%
Organization	1	1	100%

12 GEO — Generative Engine Optimization (continued)

Opportunities

Priority	Opportunity	Why it matters
MEDIUM	AggregateRating Schema Missing	Add AggregateRating schema to your LocalBusiness with ratingValue, reviewCount, and bestRating properties if your business has verifiable reviews.
MEDIUM	No SameAs Links Declared	Add a sameAs array to your LocalBusiness schema pointing to your Google Business Profile, Wikidata entry, and major directory profiles.
CRITICAL	LocalBusiness Schema Missing	Add LocalBusiness schema (or a specific subtype matching your business category) with complete name, PostalAddress, telephone, and URL in JSON-LD in the <head>.
HIGH	NAP Inconsistency — Schema and Visible Text Do Not Match	Ensure the business name, address, and phone number in your LocalBusiness schema exactly match the visible NAP text on your contact or homepage.

Findings and recommended actions

Finding	Severity	Pages	Recommended action (from the audit)
LocalBusiness Schema Missing GEO-059 · Entity authority	CRITICAL	2	Add LocalBusiness schema (or a specific subtype matching your business category) with complete name, PostalAddress, telephone, and URL in JSON-LD in the <head>.
NAP Inconsistency — Schema and Visible Text Do Not Match GEO-G1 · Brand corroboration	HIGH	2	Ensure the business name, address, and phone number in your LocalBusiness schema exactly match the visible NAP text on your contact or homepage.
GeoCoordinates Missing from LocalBusiness Schema GEO-060 · Entity authority	HIGH	2	Add a GeoCoordinates object inside your LocalBusiness schema with accurate latitude and longitude decimal values.
Business Hours Not in Structured Schema GEO-061 · Entity authority	HIGH	2	Add OpeningHoursSpecification entries to your LocalBusiness schema for every operating day, using ISO 8601 time format (HH:MM).
City Name Missing from H1 or Opening Content GEO-063 · Knowledge graph score	HIGH	2	Include the city name naturally in the H1 heading and within the first 100 words of body text. One natural mention in each position is sufficient.
Google Maps Embed Missing GEO-062 · Knowledge graph score	MEDIUM	2	Embed a Google Maps iframe on your contact or location page using the embed URL from Google Maps > Share > Embed a map.
AggregateRating Schema Missing GEO-G3 · Brand corroboration	MEDIUM	2	Add AggregateRating schema to your LocalBusiness with ratingValue, reviewCount, and bestRating properties if your business has verifiable reviews.

Continued on the next page

12 GEO — Generative Engine Optimization (continued)

Table continued from the previous page

Finding	Severity	Pages	Recommended action (from the audit)
No SameAs Links Declared GEO-G2 · Brand corroboration	MEDIUM	2	Add a sameAs array to your LocalBusiness schema pointing to your Google Business Profile, Wikidata entry, and major directory profiles.
Article Schema Missing GEO-S2 · Schema coverage	MEDIUM	1	Add an Article (or BlogPosting) JSON-LD block with: headline, author (Person), datePublished, dateModified, and publisher (Organization).
Hreflang Missing on Multi-Locale Site GEO-065 · Brand corroboration	LOW	5	Implement hreflang link elements for all language/region combinations. Include a self-referencing tag on every page and an x-default fallback. Use BCP-47 language codes (e.g. en-US, fr-FR).

13

Recommendations

Prioritised from the findings in this report

Ordered by the finding's own severity, then pages affected, then easier fixes first. Action text is stored guidance from the audit; where none is stored, none is shown. Showing the top 6 of 35 finding(s); the full list is in the dashboard. Nothing here is marked as fixed: fixes are only confirmed by a later audit.

Prioritised actions

#	Recommendation	Priority (severity)	Pages	Why it matters and recommended action
1	**No Direct Answer in First 60 Words** AEO · AEO-046 · answer_readiness	CRITICAL	5	This page does not deliver a direct answer within the first 60 words of body content. AI extraction systems are unlikely to select it for answer-layer citations. Restructure the opening paragraph to lead with the key answer or definition. Move all context and background after the first 2-3 substantive sentences.
2	**LocalBusiness Schema Missing** GEO · GEO-059 · entity_authority	CRITICAL	2	No LocalBusiness schema found. AI systems and knowledge graph engines cannot identify this business as a local entity, making geographic entity association impossible. Add LocalBusiness schema (or a specific subtype matching your business category) with complete name, PostalAddress, telephone, and URL in JSON-LD in the <head>.
3	**Google-Extended Blocked — AI Overview Visibility Eliminated** AISO · AISO-004 · crawlability	CRITICAL	N/A	Google-Extended is blocked, removing this page from Google AI Overviews and Gemini — the highest-volume AI answer surface. Remove the Google-Extended block immediately. If blocked via wildcard, add: User-agent: Google-Extended / Allow: /.
4	**PerplexityBot Access Blocked** AISO · AISO-002 · crawlability	CRITICAL	N/A	PerplexityBot is blocked, removing your content from Perplexity AI's answer and citation pool entirely. Remove the PerplexityBot block from robots.txt, or add an explicit Allow: / override if blocked by a wildcard rule.
5	**GPTBot Access Blocked** AISO · AISO-001 · crawlability	CRITICAL	N/A	robots.txt is preventing OpenAI's GPTBot from crawling this page. ChatGPT and all GPT-powered products cannot cite your content. Remove the Disallow directive for GPTBot. If blocked by a wildcard rule, add: User-agent: GPTBot / Allow: / beneath the wildcard block.
6	**Answer Buried Behind Long Introduction** AEO · AEO-050 · answer_readiness	HIGH	5	The page opens with more than 100 words of introductory content before delivering any substantive answer. AI systems weight early content most heavily for extraction. Move the key answer or primary claim to the top of the page. Context, background, and brand narrative should follow the answer, not precede it.

14

About Odito AI

SEO and AI search readiness auditing

About This Report

Odito AI audits a website for traditional SEO health and on-site readiness for AI search. This report summarises the audit data available for the website named on each page at the time the report was generated. Scores and counts reflect the pages that were crawled and the checks that were run; sections without data are shown as unavailable rather than estimated.

SEO Audit
Site crawl with on-page and technical SEO checks, grouped by severity

Accessibility Checks
Accessibility issues detected across crawled pages

PageSpeed
Desktop and mobile Lighthouse results, including Core Web Vitals

Keyword Tracking
Tracked keyword positions for your target locations

AI Search Readiness
On-site AEO, GEO and AISO checks that assess how ready your content is for AI search

Structured Data
Schema markup coverage and errors across crawled pages
